

Modern - Resume Template

For effectively organizing the details presented on a resume or an online portfolio, this template is divided into various sections namely personal statement, contact details, skills, education, projects, professional experience, portfolio, accomplishments and interests / hobbies. These sections will enable you to present your strengths and highlights of your profile in an organized fashion.

The template is developed using HTML, CSS, jQuery and the Lightbox JavaScript library.

Frequently Asked Questions

How to change the background of the webpage?

Open the *style.css* file in the *CSS* folder and refer to line number 14. It should read as follows,
background: #021B27;

You can update the background as per your needs. For instance,
background: #ebebeb;

Tools like [Color Picker](#) can be used to easily pick a specific color of your choice and obtain its corresponding HEX value.

How to replace the profile image?

Open the *images* folder and replace to the image file named *profile.jpg* with your profile image. For your reference, the dimensions of the image are 125px by 125px.

In case you choose to change the file name as well, you need to update the same in the *index.html* file. Refer to the line number 68, which reads,

```

```

SRC attribute in the above line stands for 'source'. For instance, if you changed the filename to *mypicture.png* then, your src attribute should be updated accordingly.

```

```

How to change the background of the template container?

Open *the style.css* file in the *CSS* folder and refer to the line number 62 – which reads, *background:url("../images/container-bg.png");*

As mentioned above, you may use a tool like [Color Picker](#) to pick a color of your choice and update this specific line. Please make sure you save your changes and, refresh the webpage to view the updates.

If you choose to use basic colors like black, brown, red, orange etc., then, the names of the colors can be used instead of the HEX value.

Examples,

- background:orange;
- background:black;
- background:brown;

Note: CSS is not case-sensitive; meaning: “Brown” vs. “brown” would be interpreted as same by any browser.

How to update images and captions for the Portfolio section?

Thumbnail images listed in the Portfolio section can be found in the *images/clients/thumbs* folder. Each thumbnail image is of size 70px by 70px. The large images are available in the *images/clients* folder. There are no dimension restrictions for large images.

To update captions for images, open the *index.html* file and refer to the *Portfolio* section (line 159). You may change the captions for individual images by updating the **ALT attribute** for images. For example,

```

```

How to update the skills section?

In order to update the names of skills, refer to *index.html* lines 80 through 84.

```
</li>PHP</li>
</li>Dreamweaver</li>
</li>MySQL</li>
</li>Illustrator</li>
</li>Photoshop</li>
```

Change the above verbiage to suit your profile. Furthermore, to update the skills graph, refer to lines 23 to 28 in the same file (*index.html*).

Web Fonts

Three Google Web Fonts have been used in this template to give it a modern look and feel. You may read further about these fonts at,

- [Goudy Bookletter 1911](#)
- [Port Lligat Sans](#)
- [PT Sans Narrow](#)
